

Solar & Energy Fair

A homeowner's guide to saving money & helping the environment

Sat., Nov. 5, 1-4 pm
Westwood Public Library
660 High St.

Generating your own electricity with solar panels saves you money and prevents pollution from traditional power plants.

Heating and cooling with Ductless Mini-splits or geothermal heat pumps can save even more.

Exhibitors and speakers will include installers, local experts, and Westwood homeowners who have gone fossil fuel free

Hosted by the Westwood Environmental Action Committee

Westwood Environmental Action Committee

Solar and Energy Fair

Saturday, November 5, 2016

1-4 pm

Westwood Public Library

PRESENTATION SCHEDULE

- 1:15 Solar PV: how it works; panel choices
- 1:45 Solar PV: Installation process; financing options; incentives
- 2:15 Heat Pumps: How they heat and cool efficiently; geothermal and air
- 2:45 Energy Efficiency: Audit, button up, retrofit (tentative)
- 3:15 Long term trends in solar and wind energy
